

# **From room to Zoom:** Strategies and technologies for teaching Python workshops online

Marley Kalt  
mkalt@jhu.edu

Data Services

PyCon Education Summit  
May 12, 2021

## Outline

- Our workshops
- Going virtual: Technology and workflow
- Attendee and instructor feedback

## JHU Data Services: Workshops

### Introduction to Python for Absolute Beginners

- First offered in Fall 2019
- Run twice a semester
- 2.5 – 3 hours
- 40-50 attendees (average for webinars)
- Lecture and interactive coding

Workshops since March 2020

Python: 4

Total: 78

## **JHU Data Services: Workshop Attendees**

- Open to all Johns Hopkins University affiliates
- Common affiliations:
  - Staff
  - Graduate Students
- Common schools:
  - Medicine
  - Arts & Sciences
  - Public Health

## In-Person Setup

- Controlled environment
- Provide laptops with required software
- Instructor has two display monitors
- TA's walk around the room

# Virtual Setup

JOHNS HOPKINS  
LIBRARIES

Data Services

**How can we minimize barriers to learning?**

## • Where are our students?

- What **technology** do students have available to them?
- What **skills or knowledge** do students have?
- How much **time** do students have to prepare?

What is the **minimum**  
technology/knowledge/time  
our students might have?

**Workflow**

**Technology**

## • **Workflow Adaptations**

- Provide materials in advance
- Set expectations with computer setup suggestions
- Varying workshop times

## • Technology

- **Zoom** for presentation, chat, troubleshooting
- **Poll Everywhere** for additional interaction
- **Replit.com** for live coding

## Zoom

- Familiar technology for attendees
- One session; no breakout rooms
- Use chat and breaks for troubleshooting and questions
- 1-2 assistants in every workshop
- Not great for sharing code, but sufficient for introductory class

## Poll Everywhere

- Encourages participation
- Anonymous responses
- Question types beyond multiple choice
- Several options for use: computer, tablet, cell phone

Respond at [PollEv.com/dataservices051](https://PollEv.com/dataservices051)  
Text **DATASERVICES051** to **37607** once to join, then text your message

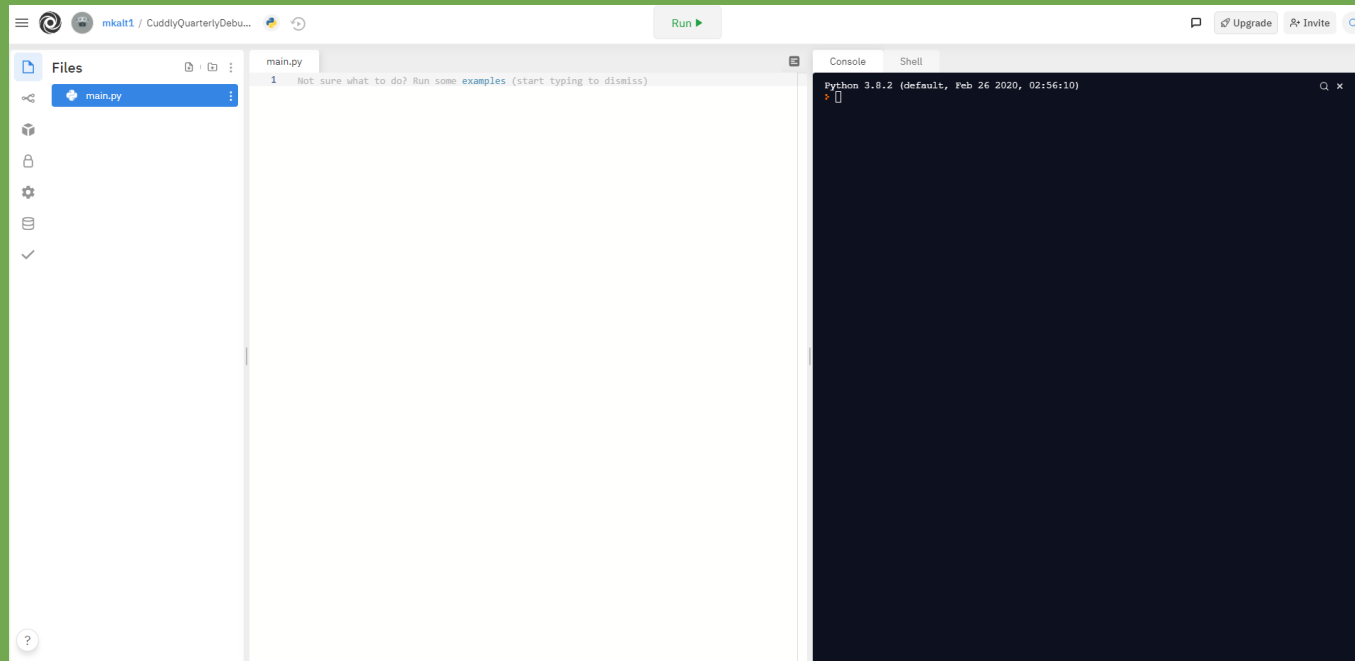

**What programming languages or data analysis software do you use?**

 No responses received yet. They will appear here...

## Replit.com

- Full-featured, cloud-based IDE
- No downloads required
- Minimizes troubleshooting
- Requires login; offered [pythonsandbox.com](https://pythonsandbox.com) as alternative

## Attendee Feedback

- Most prefer webinar format
- Some liked web-based IDE, some wanted more on IDEs
  - Created IDE overview class on popular IDE features and comparisons

Q5 Would you generally prefer to attend this webinar in-person/in-class or via webinar?

## Instructor Feedback

- Plan to continue teaching online
- Larger class sizes, can reach more students
- Webinar interest and demand remains high

## • Still working on...

- Zoom fatigue
- Sharing longer, more complicated code
- Accessibility of workshop materials and technology
- Sharing workshop materials – setting up GitHub repos!

**Thank you!**
